

The Laker Scoop

The 8th grade Hydraulic Arm Project

The 8th graders are working on a project in Mr. Scharf's class. In this project they had to build hydraulic arms, also called bots, using popsicle sticks and hydraulics. They used water to power their hydraulics. Once their bot was ready they would face an opposing team to try to push another groups arm off a platform. If your team's bot gets knocked off of the platform then your team had lost.

Staff Interview

Mr. Wissner

Mr. Wissner teaches 6th, 7th, and 8th grade. He is the assistant varsity football coach, and his favorite sport is football. The Detroit teams are his favorite; especially the Lions. His Thanksgiving family tradition is that him and his family go to the high school state championships and watch football with his family; they have gone for 20 years. Green bean casserole is his favorite thing to eat around the holidays. He hopes that the Lions will win on Thanksgiving day, which is also when he normally puts up his tree.

He wants all of his students to know that you should always meet a challenge head on and don't back down.

Thanksgiving

Thanksgiving is a holiday that originated in 1621. If you do the math; that is 402 years ago! The first Thanksgiving was celebrated in Plymouth on a ship. We celebrate Thanksgiving to thank the harvest and other blessings of the year.
